**Tools Required**

Drill; Pencil; 6mm masonry drill bit; 6mm ceramic drill bit (optional); Spirit Level;  
Cross head screwdriver;

**KEEP DIY TOOLS OUT OF THE REACH OF CHILDREN**

**Safety and Care Advice**

1. Always take care when using an electric drill, particularly in the bathroom. Always check for hidden cables and pipework before drilling. Always use a residual current circuit breaker (RCCB) when using mains powered tools and take extreme care if there is any water in the working area.
2. Always wear suitable eye protection when drilling.
3. If the product is to be fitted on a ceramic tiled wall, a ceramic drill bit should be used. Do not drill mounting holes in the grouted area between tiles. Mask the area around the hole with tape before drilling to prevent damage to the tile.
4. Do not use the product as a grab bar.

**Instructions:**

1. Select the location of the product, ensuring there is sufficient room to adjust the mirror and that the mirror arm is horizontal.
2. Mark its screw fixing positions on the wall using the hole centres of the mirror bracket as a template. (See Fig. 1)
3. Drill the holes to a depth of 30mm in the marked positions using a 6mm masonry drill. If the product is to be fitted onto a ceramic tiled wall, a ceramic drill bit should be used.
4. Insert the wall plugs flush to the surface of the wall. If fitting to a tiled surface the wall plugs should be inserted below the surface of the tile to avoid cracking.
5. Insert the screws provided through the holes of the mirror wall bracket and screw into position. Ensure the mirror bracket is level. **DO NOT OVERTIGHTEN.**

**Additional Information**

Do not strike the mirror glass with hard or sharp objects.

**Product Care Advice**

- To retain the best quality finish, clean product regularly with a soft damp cloth.
- Do not use abrasive or chemical cleaners, as these will damage the product.
- Do not place hot objects onto the surface of the glass.
- Do not position glass components in close contact with a heat source
